Bericht

The Publication(s) of the Remaining Fragments of 11 QTemple^b

Ulrich Dahmen (Bonn)

The official publication of the remaining fragments of the second copy of the so called Temple Scroll, 11QTemple^b (11 Q 20), has been long in coming. Most of them are well-known since the excellent *editio princeps* of the Temple Scroll (11 QTemple^a = 11 Q 19) by Yigael Yadin¹. With the help of these fragments he had reconstructed the text of the first copy of the Temple Scroll, but they appeared only in the Supplementary Plates 35* - 40* and have never been transcribed separately. Now recently all (?) the remaining fragments of 11 QTemple^b were made available in two publications, nearly at the same time and independent of each other, by F. García Martínez² and by Ben Zion Wacholder³. The quantity and the numbering of the fragments in these articles are not identical. Each of them has some fragments missing and also some fragments surplus in comparison with the other one.

I think it would be very helpful for the work on this text and these fragments and for the scholarly discussion about the Temple Scroll to have a concordance in which each fragment number is listed with its corresponding number of the other publication. This list is given in table 1.

The information concerning the numbering of the fragments which were available hitherto only as photographs⁸, are to be found at García Martínez within his article and Ben Zion Wacholder, p. 108 (Index C), and are therefore not listed here again. The discussion which fragments of Cave 11 in fact belong to the various copies of the Temple Scroll has just begun⁹ and will sure go on for a while.

A final and more general remark: Because this material is part of the Dutch share of the texts from Cave 11, the fragments of 11 QTemple^b should be cited in future according to the numbering of the (official) García Martínez-edition¹⁰.
